Data in Many Forms . . .

Statistics Canada disseminates data in a variety of forms. In addition to publications, both standard and special tabulations are offered on computer print-outs, microfiche and microfilm, and magnetic tapes. Maps and other geographic reference materials are available for some types of data. Direct access to aggregated information is possible through CANSIM, Statistics Canada's machine-readable data base and retrieval system.

Des données sous plusieurs formes . . .

Statistique Canada diffuse les données sous formes diverses. Outre les publications, des totalisations habituelles et spéciales sont offertes sur imprimés d'ordinateur, sur microfiches et microfilms et sur bandes magnétiques. Des cartes et d'autres documents de référence géographiques sont disponibles pour certaines sortes de données. L'accès direct à des données agrégées est possible par le truchement de CANSIM, la base de données ordiolingue et le système d'extraction de Statistique Canada.

Statistical Highlights

(See also Text Table I)

- The performance of the manufacturing sector of the economy levelled off in 1986 following the strong recovery shown in the preceding years. The overall value of all shipments of goods of own manufacture reported by manufacturing establishments in Canada for the year 1986 came to \$253.4 billion, up 1.9% from \$248.7 billion in 1985. This year-over-year increase was down sharply from increases of 8.0%, 13.2% and 8.3% in 1985, 1984 and 1983 respectively; all based on current dollars. A major factor in holding down the increase in shipments in 1986 was the sharp drop in World oil prices that year (see below).
- To place the above 1986 performance in perspective it is interesting to observe other measures of the manufacturing sector which reflect changes in price and quantity. The Gross Domestic Product at constant prices for this sector rose 2.6% in 1986 (versus a 5.5% increase in 1985) while the Industrial Product Price Index recorded a marginal increase of 0.8%. As a percentage of the total Canadian G.D.P. the manufacturing sector eased slightly from 19.3% in 1985 to 19.2% in 1986.
- An analysis of the 1986 growth of 1.9% by the component industry groups reveals the main sources of strength came from the Furniture and Fixture Industries group which gained 18.0% to \$4.0 billion; the Plastic Products group which grew 13.6% to \$4.4 billion and the Non-Metallic Mineral Products group with a 12.8% rise to \$6.6 billion. Forest-based industries were strong performers with the Wood Industries group, up 11.8% to \$12.4 billion and the Paper and Allied Products group growing 11.0% to \$20.1 billion. The only other major group to record an increase in excess of 10% was the Primary Textile Industries group, up 10.8% to \$3.0 billion.
- The weakest performance by far was turned in by the large Refined Petroleum and Coal Products group which plunged by 35.5% from \$24.4 billion to \$15.8 billion. Other weak performers included the Tobacco Products group, down 1.1% to \$1.6 billion; the Primary Metal Industries group, up 0.8% to \$17.1 billion; and the Leather and Allied Products group, up 1.3% to \$1.3 billion. The huge drop in the Refined Petroleum and Coal Products group is an aberration reflecting a sharp drop in World oil prices in 1986. The impact of this decline

Faits saillants

(voir également le tableau explicatif I)

- La performance du secteur manufacturier de l'économie s'est stabilisée en 1986 après la forte reprise qu'elle avait connue au cours des années précédentes. La valeur totale des livraisons de produits de propre fabrication déclarées par les établissements manufacturiers du Canada pour l'année 1986 s'est élevée à \$253.4 milliards, une hausse de 1.9% par rapport au total de \$248.7 milliards en 1985. Cette augmentation annuelle est bien moindre que les hausses de 8.0%, 13.2% et 8.3% enregistrées en 1985, 1984 et 1983 respectivement. (Il s'agit dans tous les cas d'augmentations exprimées en dollars courants.) La brusque diminution des prix mondiaux du pétrole en 1986 a contribué principalement à la stabilisation des livraisons au cours de la même année (voir ci-dessous).
- Quand on situe dans son contexte la performance de 1986, il est intéressant d'observer d'autres mesures retenues dans le secteur manufacturier qui témoignent des variations de prix et de quantité. Le produit intérieur brut, exprimé en dollars constants, a augmenté de 2.6% en 1986 (comparativement à une hausse de 5.5% en 1985) alors que l'indice des prix des produits industriels enregistrait une augmentation marginale de 0.8%. Le pourcentage du PIB total du Canada que représente le secteur manufacturier a diminué légèrement, passant de 19.3% en 1985 à 19.2% en 1986.
- Une analyse de la croissance de 1.9%, enregistrée en 1986 par groupe d'industries, révèle qu'elle est surtout attribuable à la performance des industries du meuble et des articles d'ameublement, qui s'est accrue de 18.0% pour atteindre \$4.0 milliards, à celle des industries des produits en matière plastique, qui a augmenté de 13.6% pour se chiffrer à \$4.4 milliards, et à celle des industries des produits minéraux non métalliques, qui a connu une hausse de 12.8% pour s'établir à \$6.6 milliards. Les industries axées sur les ressources forestières ont réalisé une bonne performance, le groupe des industries du bois ayant augmenté de 11.8% pour atteindre \$12.4 milliards et le groupe des industries du papier et des produits connexes ayant enregistré une hausse de 11.0% pour s'établir à \$20.1 milliards. Le seul autre grand groupe ayant affiché une augmentation de plus de 10% a été celui des industries textiles de première transformation (+10.8%, à \$3.0 milliards).
- La plus faible performance a de loin été réalisée par l'important groupe des industries des produits raffinés du pétrole et du charbon, qui a connu une chute de 35.5%, passant de \$24.4 milliards à \$15.8 milliards. Parmi les autres groupes les moins performants, mentionnons les industries du tabac (-1.1%, à \$1.6 milliard), les industries de première transformation des métaux (+0.8%, à \$17.1 milliards) et les industries du cuir et des produits connexes (+1.3%, à \$1.3 milliard). La forte diminution dans le groupe des industries des produits raffinés du pétrole et du charbon représente une aberration qui

was so significant that if this major group were excluded from the manufacturing sector, the aggregate of the other 21 major groups of industries comprising the manufacturing sector would have recorded a relatively respectable shipment increase of 6.0%.

- The census value added for the manufacturing sector was not affected nearly as much by the oil price drop in 1986 as were the shipment figures. This was evidenced by the increase of 6.1% in value added for total activity by **all** industries in the manufacturing sector, as compared with a 7.0% gain for the other 21 major groups excluding the Refined Petroleum and Coal Products group. In 1985 the **shipment** and **value added** increases (for all manufacturers) were almost identical at 8.0% and 7.7% respectively.
- Tracing the strongest growth areas back to the provincial level, the 18.0% growth in the Furniture and Fixtures Industries group reflected a general strength across the Nation. British Columbia led the provinces with a jump of 35.9% on under 4% of the National total volume while Nova Scotia gained 30.0% on 0.4% of National volume and Alberta rose 23.5% on 3% of the National shipments. Meanwhile Ontario and Quebec, who account for 88% of all Canadian shipments, recorded solid gains of 17.2% and 17.4% respectively. The Plastic Products group is concentrated in Ontario where 59% of the National shipments originate and Ontario shipments rose 15.6% to account for most of the National increase of 13.6%. British Columbia and Alberta, each with over 5% of the National volume, posted gains of 16.9% and 14.1% respectively while New Brunswick jumped 19.1% on just under 1% of Canadian shipments. The Non-Metallic Mineral Products group increase of 12.8% was again largely attributable to Ontario where shipments rose 17.3% on 53% of the Canada total. Manitoba and Newfoundland recorded gains of 23.8% and 24.8% on shipments representing 3% and 1% of the National total.

The Wood Industries growth of 11.8% was concentrated in Central Canada with gains of over 18% in both Ontario and Quebec. The largest producer, British Columbia, only managed a moderate increase of 5.1%. Strong percentage gains of between 15% and 20% were recorded by Alberta, New Brunswick and Prince Edward Island on volumes equal to 5%, 3% and under 1% of the National total, respectively. The Paper and Allied Products group increase of 11.0% was led by a 15.5% growth in British Columbia on 20% of the National volume and a 21.6% jump in New Brunswick which accounted for 6% of Canadian shipments. The Primary Textile Industries group

reflète la chute marquée des prix mondiaux du pétrole en 1986. Le recul a eu un tel impact que si l'on avait exclu ce grand groupe du secteur manufacturier, la valeur totale des livraisons des 21 autres aurait connu une augmentation relativement respectable de 6.0%.

- La chute des prix du pétrole en 1986 a eu plus de répercussions sur le total des livraisons que sur la valeur ajoutée du recensement pour le secteur manufacturier. Ainsi, l'augmentation a été de 6.1% pour la valeur ajoutée de l'activité totale pour **toutes** les industries du secteur manufacturier, comparativement à une augmentation de 7.0% pour les 21 autres grands groupes, exception faite des industries des produits raffinés du pétrole et du charbon. En 1985, les hausses des **livraisons** et de la **valeur ajoutée** (pour tous les fabricants) étaient presque identiques, soit 8.0% et 7.7% respectivement.
- L'analyse, par province, des groupes principaux les plus forts révèle que la hausse de 18.0% enregistrée par les industries du meuble et des articles d'ameublement reflète une croissance générale partout au pays. La Colombie-Britannique a devancé les provinces en enregistrant une augmentation de 35.9% sur moins de 4% des livraisons totales du pays, alors que la Nouvelle-Écosse connaissait un accroissement de 30.0% sur 0.4% du volume du pays et que l'Alberta réalisait une hausse de 23.5% sur 3% des livraisons nationales. Pour leur part, l'Ontario et le Québec, qui comptent pour 88% de toutes les livraisons canadiennes, ont enregistré de fortes augmentations de 17.2% et de 17.4% respectivement. Les industries des produits en matière plastique sont concentrées en Ontario, où s'effectuent 59% des livraisons du pays. Les livraisons de l'Ontario ont augmenté de 15.6% et elles ont été la principale cause de l'augmentation nationale de 13.6%. La Colombie-Britannique et l'Alberta, représentant chacune plus de 5% du volume à l'échelle du pays, ont enregistré des gains de 16.9% et de 14.1% respectivement, tandis que le Nouveau-Brunswick a enregistré un gain de 19.1% sur un peu moins de 1% des livraisons canadiennes. L'augmentation de 12.8% enregistrée par les industries des produits minéraux non métalliques a été surtout attribuable encore une fois à l'Ontario, où les livraisons ont augmenté de 17.3% pour représenter 53% du total canadien. Le Manitoba et Terre-Neuve ont enregistré des gains de 23.8% et de 24.8%, leurs livraisons représentant 3% et 1% du total national.

La croissance de 11.8% enregistrée par les industries du bois a été réalisée dans le centre du Canada, où les gains ont été de plus de 18% en Ontario et au Québec. La Colombie-Britannique n'a connu qu'une augmentation modérée de 5.1%. De forts pourcentages d'accroissement, allant de 15% à 20%, ont été enregistrés par l'Alberta, le Nouveau-Brunswick et l'Île-du-Prince-Édouard, où les volumes ont atteint respectivement 5%, 3% et moins de 1% du total national. L'augmentation de 11.0% affichée par les industries du papier et des produits connexes a été surtout attribuable à la hausse de 15.5% en Colombie-Britannique sur 20% des livraisons du pays et à une majoration de 21.6% au Nouveau-Brunswick, qui compte pour 6% du total

growth of 10.8% was largely attributable to a 15.9% rise in Quebec where 56% of the National shipments took place.

- The sharp 35.5% decline recorded by the Refined Petroleum and Coal Products group was spread across the Nation, as might be expected given the cause. The Province of Quebec however did record an exceptional decline of 50.9% on a volume equal to 17% of the National shipment total, apparently reflecting the impact of refinery shutdowns as well as the drop in World prices. The 1.1% decline in Tobacco Products shipments reflects a drop of 4.0% in Ontario as the only other producing province, Quebec, showed a 1.9% gain.

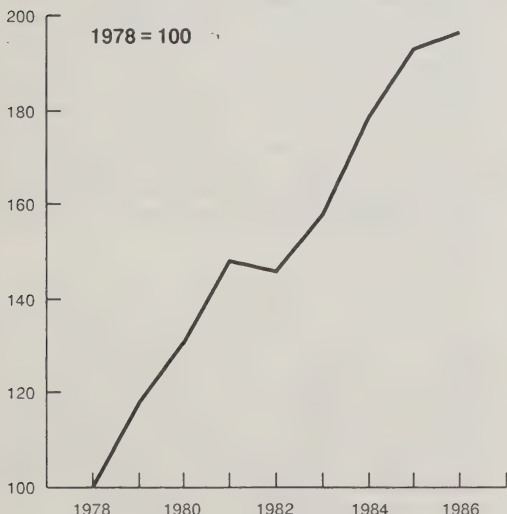

The relatively small increase of 0.8% reported by the Primary Metal Industries largely reflects a 1.3% decrease in Ontario where 57% of the National activity took place. Manitoba and Alberta posted sharp declines of 26.3% and 16.9% on volumes equal to 2% and 4% of the Canada total respectively. Quebec bucked the trend with an 11.5% increase on 30% of the National shipment total. The Leather and Allied Products group's growth of only 1.3% reflects a 2.1% decline in Ontario where 57% of National shipments took place. All other publishable provinces reported modest increases.

canadien. L'augmentation de 10.8% des livraisons des industries textiles de première transformation a été en grande partie attribuable à une hausse de 15.9% au Québec, où 56% des livraisons nationales ont eu lieu.

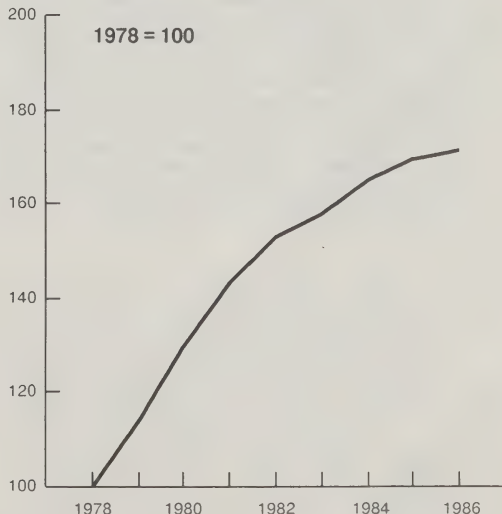

- La baisse marquée de 35.5% enregistrée par les industries des produits raffinés du pétrole et du charbon était répartie un peu partout au pays, comme il fallait s'y attendre. Pour sa part, la province de Québec enregistrait un recul exceptionnel de 50.9% sur un volume représentant 17% du total canadien. Cette situation reflète, de façon évidente, autant la conséquence des fermetures de raffineries que la chute des prix mondiaux. La baisse de 1.1% des livraisons des produits du tabac est attribuable à une diminution de 4.0% en Ontario, alors que la seule autre province productrice, le Québec, enregistrait un gain de 1.9%.

L'augmentation relativement petite de 0.8% rapportée par les industries de première transformation des métaux reflète en grande partie une diminution de 1.3% en Ontario, où 57% de l'activité nationale a eu lieu. Le Manitoba et l'Alberta ont accusé des baisses marquées de 26.3% et 16.9% sur des volumes correspondant à 2% et 4% du total canadien respectivement. Le Québec a ralenti la tendance à la baisse en rapportant une augmentation de 11.5% sur des livraisons correspondant à 30% du total national. L'accroissement de 1.3% seulement des livraisons des industries du cuir et des produits connexes reflète un fléchissement de 2.1% en Ontario, où se sont produites 57% des livraisons nationales. Toutes les autres provinces publiables ont déclaré de modestes augmentations.

- Comparing the overall performance of the ten provinces, the strongest growth rates occurred in three of the Atlantic Provinces. Newfoundland led with an increase of 16.3% to \$1,424 million, largely attributable to a 23.5% gain in Food Industries, principally Fish Products, and a 24.8% rise in shipments of Non-Metallic Mineral Products. These 2 groups accounted for half the Province's shipments (46% and 4% respectively). New Brunswick shipments jumped 15.7% to \$4,909 million vaulting that province ahead of Nova Scotia for the first time since 1981. This strength was based on New Brunswick's forest industries as Paper and Allied Products rose 21.6% while Wood Industries gained 16.6% on volumes representing 24% and 8% of provincial total shipments respectively. Prince Edward Island recorded the third best growth rate in 1986 with a shipment increase of 9.7%. This was essentially due to a 10.3% increase in the Food Industries group where 69% of that Province's shipments took place.
- The only province to record a decrease in shipments was Alberta which fell 11.7%. Certainly the oil price drop exacerbated this decline, yet if the Refined Petroleum and Coal Products group (down 38.9%) is eliminated and year-over-year changes are calculated for the remaining 21 major industry groups, Alberta still has the weakest performance with a decrease of 0.3%. Other major groups contributing to this weakness were Primary Metal Industries (down 16.9%), Electrical and Electronic Products (down 14.4%) and Food Industries, now the largest group in Alberta, (down 3.7%). The next weakest performance was the 0.3% increase in Nova Scotia followed by the 0.6% rise in Quebec. The impact of the 50.9% drop in the refined Petroleum and Coal Products group in Quebec was severe. If this group is eliminated and calculations are based on the remaining 21 major groups the Quebec increase becomes 5.9%. Unfortunately this major group was confidential in Nova Scotia, however the oil price drop was undoubtedly a factor in depressing the shipment figures in that province too.
- An analysis of the distribution of manufacturing activity across the Country shows a continuation of the recent trend towards an increasing concentration of manufacturing activity in Ontario. The proportions of the total manufactured shipments for Canada accounted for by the leading provinces in 1986 (with comparable 1985 and 1984 percentages in brackets) are as follows: Ontario 54.0% (1985 = 53.1%, 1984 = 52.9%); Quebec 24.1% (24.3%, 24.8%); British Columbia 8.0% (8.0%, 7.8%); Alberta 6.0% (6.9%, 6.6%); and Manitoba 2.2% (2.2%, 2.2%).
- La comparaison de la performance globale des dix provinces montre que trois provinces atlantiques ont enregistré les plus forts taux de croissance. Terre-Neuve vient en tête avec une augmentation de 16.3% (\$1,424 millions), qui est surtout due à un accroissement de 23.5% des livraisons des industries des aliments, principalement les produits de la pêche, et à une hausse de 24.8% des livraisons des produits minéraux non métalliques. Ces deux groupes ont représenté la moitié des livraisons de la province (46% et 4% respectivement). Les livraisons du Nouveau-Brunswick ont augmenté de 15.7% (\$4,909 millions), plaçant cette province devant la Nouvelle-Écosse pour la première fois depuis 1981. Cet accroissement a été causé par les industries axées sur les ressources forestières du Nouveau-Brunswick, les industries du papier et des produits connexes ayant enregistré une hausse de 21.6% et les industries du bois ayant connu une augmentation de 16.6%, soit respectivement 24% et 8% du volume total des livraisons provinciales. L'Île-du-Prince-Édouard a enregistré en 1986 le troisième taux de croissance en importance, ses livraisons ayant affiché une augmentation de 9.7%. Ceci est essentiellement dû à une hausse de 10.3% rapportée par les industries des aliments, qui ont réalisé 69% des livraisons de cette province.
- L'Alberta a été la seule province à enregistrer une diminution de ses livraisons (-11.7%). Bien que la chute des prix du pétrole ait sans aucun doute contribué à cette régression, si l'on ne tient pas compte du groupe des industries des produits raffinés du pétrole et du charbon (-38.9%) et si l'on calcule les variations annuelles pour les 21 autres grands groupes d'industries, l'Alberta obtient encore la performance la plus faible (-0.3%). Les autres grands groupes qui ont contribué à ce fléchissement ont été les industries de première transformation des métaux (-16.9%), les industries des produits électroniques et électriques (-14.4%) et les industries des aliments, actuellement le groupe le plus important en Alberta (-3.7%). Les performances les plus faibles suivantes ont été enregistrées par la Nouvelle-Écosse (+0.3%) et le Québec (+0.6%). La baisse de 50.9% dans le groupe des industries des produits raffinés du pétrole et du charbon a eu d'importantes conséquences au Québec. Si l'on ne tient pas compte de ce groupe et si l'on effectue les calculs à partir des 21 autres, l'augmentation des livraisons du Québec est de 5.9%. En Nouvelle-Écosse, ce grand groupe était malheureusement confidentiel mais la chute des prix du pétrole a sans aucun doute contribué également à la baisse du volume des livraisons de cette province.
- Une analyse de la répartition de l'activité manufacturière dans l'ensemble du pays permet de constater, comme au cours des dernières années, que celle-ci tend de plus en plus à se concentrer en Ontario. Les proportions des livraisons manufacturières totales du Canada que représentent les principales provinces en 1986 (les pourcentages comparables de 1985 et 1984 étant indiqués entre parenthèses) sont les suivantes: Ontario, 54.0% (1985 = 53.1%, 1984 = 52.9%); Québec, 24.1% (24.3%, 24.8%); Colombie-Britannique, 8.0% (8.0%, 7.8%); Alberta, 6.0% (6.9%, 6.6%); et Manitoba, 2.2% (2.2%, 2.2%).

For further analytical detail, the reader is referred to Text Table I which shows percentage fluctuations in shipments in each (publishable) major industry group for Canada, the provinces and the North.

The data in this publication are based on a comprehensive **census** of all active manufacturing establishments. More up-to-date information on the value of shipments may be obtained by ordering Catalogue 31-001, **Monthly Survey of Manufacturing**. This publication presents monthly data based on a **survey** and indicates a growth of approximately 6% in shipments of manufactured goods in 1987 over the 1986 total, with a further 7% growth projected for 1988.

Pour une analyse plus poussée, le lecteur est prié de consulter le tableau explicatif 1, qui présente les variations en pourcentage des livraisons dans chaque grand groupe d'industries (publiable) pour le Canada, les provinces et le Nord.

Les données contenues dans la présente publication sont fondées sur un **recensement** complet de tous les établissements manufacturiers actifs. Le lecteur peut obtenir plus de renseignements à jour sur la valeur des livraisons en commandant la publication intitulée **Enquête mensuelle sur les industries manufacturières** (n° 31-001). Cette publication, qui contient des données mensuelles fondées sur une **enquête**, fait état d'une croissance d'environ 6 % dans les livraisons de biens de propre fabrication en 1987 par rapport au total de 1986 et d'une autre croissance de 7 % prévue pour 1988.

Introduction

General

This report provides, in a condensed summary form, principal statistics on all individual manufacturing industries and industry groups for Canada, its regions and provinces as derived from the 1986 Census of Manufactures. The main tables consolidate, on a national, regional and provincial basis, with expanded detail on total activity, the 1986 statistics in Table 1 of the individual industry bulletins. The purpose of those bulletins is to provide detailed principal statistics on individual industries; of this report, to give a comprehensive picture, on the basis of principal statistics, of the geographical dispersion, down to the provincial level, of as many of the 22 two-digit major groups, the 110 three-digit groups and their 236 component four-digit manufacturing industry classes as the confidentiality provisions of the Statistics Act permit. A companion report, **Products Shipped by Canadian Manufacturers** (Catalogue 31-211) provides similar comprehensive coverage of commodity shipments for Canada and the provinces. Principal statistics on the manufacturing industries for sub-provincial areas (economic regions, census divisions (counties or their equivalents), census metropolitan areas, selected census agglomerations and municipalities) are published in the **Manufacturing Industries of Canada: Sub-provincial Areas** (Catalogue 31-209).

The main tables on industries and industry groups in this report are supplemented by those containing selected historical statistics, statistics on leading industries and the numbers of establishments, by industry class and employment size count. The latter provide what is, in effect, an industrial profile of each province and region.

Five tables in the section entitled "Type of Organization and Size of Establishment" at the end of this publication show principal statistics stratified by type of organization and by size of establishment.

Methodology and Data Collection

The basic data for this report have been compiled according to the 1980 revision of the "Standard Industrial Classification".¹ A list of the industries included in the census, together with their SIC codes, is published as Appendix E. Readers wishing information on the effect of implementing the 1980 revision of the Standard Industrial Classification are referred to the special notes in the 1983 issue of this publication.

Introduction

Généralités

Le présent bulletin renferme, sous forme condensée et pratique, les statistiques principales se rapportant aux toutes industries manufacturières et aux grands groupes d'industries du Canada, des provinces et des régions, tirées du recensement des manufactures pour 1986. Les tableaux principaux groupent, aux niveaux national, provincial et régional les statistiques de 1986 fournies par les bulletins individuels sur les industries et présente une vue plus détaillée de l'activité totale. Ces bulletins ont pour but de présenter des statistiques principales pour les industries individuelles, ce bulletin vise à présenter, à partir des statistiques principales, la répartition géographique complète, jusqu'au niveau provincial, des 22 grands groupes à deux chiffres, des 110 groupes d'industries manufacturières à trois chiffres et de leurs 236 classes composantes à quatre chiffres, compte tenu des dispositions de la Loi sur la statistique concernant la confidentialité des données. Une publication du même genre intitulée **Produits livrés par les fabricants canadiens** (n° 31-211 au catalogue) renferme des données aussi complètes sur les livraisons de produits au Canada et dans les provinces. Les statistiques principales des industries manufacturières situées dans des régions infraprovinciales (régions économiques, divisions de recensement (comtés ou leurs équivalents), régions métropolitaines de recensement, certaines agglomérations de recensement et municipalités) figurent dans le bulletin **Industries manufacturières du Canada: Niveau infraprovincial** (n° 31-209 au catalogue).

Dans cette publication, les tableaux principaux sur les industries et les grands groupes d'industries sont complétés par d'autres tableaux qui contiennent certaines statistiques chronologiques, des statistiques sur les principales classes d'industries et le nombre d'établissements selon l'activité et les effectifs. Ces derniers tableaux illustrent, dans les faits, le profil industriel de chaque province et région.

Les cinq tableaux dans la section intitulée "Forme d'organisation et taille des établissements" à la fin de cette publication présentent les statistiques principales selon la forme juridique et la taille des établissements.

Méthodologie et collecte des données

Les données de base du présent bulletin ont été compilées d'après la version révisée de 1980 de la "Classification des activités économiques" (CAÉ) (maintenant connue comme la "Classification type des industries" ou CTI)¹. L'appendice E renferme la liste des industries recensées ainsi que leurs codes de la CTI. Pour plus de renseignements sur les répercussions qu'a causées l'application de la nouvelle Classification type des industries, le lecteur est prié de consulter les notes spéciales dans l'édition de 1983 de cette publication.

¹ Statistique Canada: **Classification type des industries, révisée en 1980** (n° 12-501F au catalogue).

Data are collected by means of three types of questionnaires mailed to reporting units classified to the manufacturing industries as well as the use of Revenue Canada records. The "long form" is sent to large establishments, requesting detailed information on principal statistics and on commodity inputs and outputs, while the "head office form" is sent to head offices and ancillary units which report separately.

Beginning with the 1976 Census, data for small establishments have been mostly obtained from administrative records of Revenue Canada, as provided for by legislation. These data are strictly confidential as regards particulars relating to specific individuals or businesses and are used only by Statistics Canada to produce aggregations or summary calculations.

Where administrative records for small establishments are not available, such establishments are sent a "short form" or abbreviated questionnaire which asks only for certain information usually found in the financial statements of a business. Respondents may omit completing most of this questionnaire if they return a copy of their financial statements.

The criteria for differentiating "large" and "small" establishments vary by industry and province (and from year to year) but, in general, are governed by the objective of minimizing the burden on respondents without the loss of a significant amount of detail on the types of products shipped, materials consumed, etc. In 1986 the "large" establishments accounted for only 31.0% of the number of establishments but for 92.0% of the manufactured shipments.

These percentages represent a continuing decrease from previous years reflecting our attempts to reduce response burden and cut survey costs. Since "short form" questionnaires do not break out administrative employees from production workers, this transfer of firms from long to short questionnaires has had the effect of deflating slightly the figures shown for administrative personnel while inflating production workers by similar amounts.

Concepts and Definitions

An abbreviated version of the major concepts and definitions used in the Census of Manufactures is printed as "Explanatory Notes" at the back of this publication.

Further information may be obtained from the Analysis and Development Section, Industry Division, Statistics Canada, Ottawa, Ontario, K1A 0T6. Of interest to those studying employment data would be the technical paper *The Census of Manufactures and the Labour Force Survey: some experimental approaches to comparing establishment and household survey data* by H.D. Potter, 1982, which is available from the above Section.

Les données sont collectées au moyen de trois genres de questionnaires envoyés par la poste aux unités déclarantes classées parmi les industries manufacturières, ainsi que l'usage des dossiers de Revenu Canada. Le "questionnaire long" est envoyé aux grands établissements afin de recueillir des renseignements détaillés sur les statistiques principales et les entrées et sorties de marchandises; le questionnaire du "siège social" est envoyé aux sièges sociaux et aux unités auxiliaires qui produisent une déclaration distincte.

A partir du recensement de 1976, la plupart des données pour les petits établissements proviennent, des dossiers administratifs de Revenu Canada, conformément aux dispositions de la loi. Les données ayant trait aux particuliers et aux entreprises individuelles sont strictement confidentielles et seul Statistique Canada peut les utiliser pour produire des regroupements ou des calculs sommaires.

Lorsque les dossiers administratifs des petits établissements ne sont pas disponibles, on envoie à ces derniers une formule abrégée dans le but d'obtenir certains renseignements que l'on trouve habituellement dans les états financiers d'une entreprise. Les enquêtés peuvent ne pas répondre à la plupart du questionnaire s'ils renvoient un exemplaire de leurs états financiers.

Les critères servant à distinguer les "grands" des "petits" établissements varient selon l'industrie et la province (et aussi d'une année à l'autre); toutefois, ils ont pour tâche commune de réduire le plus possible le fardeau des répondants sans pour autant perdre un volume important de données sur les livraisons de marchandises par type de produits, matériaux consommés, etc. En 1986 les "grands" établissements sont intervenus pour seulement 31.0% du nombre des établissements mais pour 92.0% des livraisons manufacturières.

Ces pourcentages représentent un décroissement, comparativement aux années précédentes, résultant de nos efforts visant à réduire le fardeau de réponse et à diminuer les coûts. Étant donné que les questionnaires abrégés ne donnent pas de chiffres distincts pour les employés administratifs et les travailleurs de la production, ce transfert d'établissements des longs questionnaires aux questionnaires abrégés a eu pour effet de dégonfler les statistiques pour employés administratifs tandis que les chiffres pour les travailleurs de la production ont été augmentés d'une façon semblable.

Concepts et définitions

Une version abrégée des principaux concepts et définitions utilisés dans le cadre du recensement des manufactures figure dans les "Notes explicatives" à la fin de cette publication.

Changes Affecting Historical Comparability of Data

Questionnaires are thoroughly reviewed each year in order to ensure they reflect changes in conditions in the manufacturing industries and in the economic significance of various reporting units and data items. Although alterations are kept to a minimum in order to minimize breaks in historical continuity, some changes are inevitable. The following summary of the more important changes in questionnaires, concepts and coverage in recent years may be useful to those readers particularly interested in this aspect:

The 1970 Revision of the Short Form

One of the more significant changes was the introduction in 1970 of a considerably simplified short form which is briefly described under "Small Establishments" in the "Explanatory Notes". Changes introduced at that time affect virtually all items of principal statistics for small establishments and are most noticeable in industries or provinces where small establishments account for a significant proportion of the total.

As the revised short form consists substantially of information usually found in a financial statement of a business, definitions and data editing procedures applicable to short form records also apply essentially to small establishment data derived from administrative records of Revenue Canada as described above.

Change in Fiscal Year Accepted

Data for a few industries were significantly affected by changes in 1970 in the fiscal year acceptable for census reporting purposes. In the 1969 Census of Manufactures and for many years preceding, data would be accepted for fiscal years ending as late as June 30 of the calendar year following the reference year. In the interests of timeliness of Census results, this rule was changed effective with the 1970 Census. Henceforth fiscal years have been accepted ending as early as April 1 of the reference year or as late as March 31 of the following calendar year.

Returns on a calendar year basis are the most frequent case. In 1970, establishments making returns for years ending in December accounted for 73% of shipments of goods of own manufacture, whereas in 1986 they accounted for 69.5%.

Change in Fuel Reporting Procedures

In 1982, for the first time, fuel and electricity costs were compiled separately for small firms instead of being included in "cost of materials and supplies". Therefore starting with the year 1982 the fuel and electricity figures shown in this and other publications

Modifications influant sur la comparabilité chronologique des données

Chaque année, on revoit entièrement les questionnaires afin de tenir compte de toute situation nouvelle dans le secteur manufacturier et de l'importance économique des diverses unités de déclaration et des données qu'elles produisent. On essaie de réduire au minimum les solutions de continuité; cependant, certaines modifications sont nécessaires. Voici, à titre d'information, un résumé des plus importantes modifications qui ont été apportées au cours des dernières années aux questionnaires, aux concepts et au champ d'enquête:

Révision de 1970 du questionnaire abrégé

L'une des modifications les plus importantes a été le lancement, en 1970, d'un questionnaire grandement simplifié, dont une brève description paraît à la rubrique "Petits établissements" des "Notes explicatives". Les changements effectués à cette date influent sur presque toutes les statistiques principales relatives aux petits établissements, surtout dans les provinces et les industries où les petits établissements représentent une part importante du nombre total d'établissements.

Étant donné que les formules abrégées renferment essentiellement les mêmes renseignements que l'on trouve dans l'état financier d'une entreprise, les définitions et les méthodes de vérification des données relatives aux formules abrégées s'appliquent aussi essentiellement aux données des petits établissements qui sont tirées des dossiers administratifs de Revenu Canada, comme il est décrit ci-dessus.

Modification des années financières acceptées

Les données pour quelques industries ont été considérablement touchées par deux modifications apportées en 1970 à l'année financière choisie aux fins du recensement. Au recensement des manufactures pour 1969 et depuis bien des années, on acceptait les données des années financières pouvant se terminer jusqu'au 30 juin de l'année civile suivant l'année de référence. Afin de hâter la publication des résultats du recensement, cette règle a été modifiée lors du recensement de 1970. Désormais, on n'accepterait plus que les années financières commencées le 1^{er} avril de l'année de référence ou terminées au plus tard le 31 mars de l'année civile suivante.

Les déclarations produites selon l'année civile sont les plus fréquentes; en 1970, les établissements qui ont présenté des déclarations pour des années terminées en décembre ont représenté 73% des livraisons des produits de propre fabrication comparativement à 69.5% en 1986.

Changement dans la procédure de déclaration au sujet du combustible

En 1982, pour la première fois, les coûts du combustible et de l'électricité ont été calculés séparément pour les petites entreprises et ne sont plus compris dans "coût des matières et fournitures". C'est donc dire qu'à compter de 1982, les chiffres sur le combustible et l'électricité dans cette publication et

reflect **all** establishments and not just the large ones as was the case in prior years back to 1970. For the year 1986 these small firms accounted for only 4.6% of total fuel and electricity costs.

Imputation of Person-hours and Employees for Small Establishments

As indicated in the "Explanatory Notes", beginning with 1970 data, employees in small establishments have been imputed from reported salaries and wages; this also applies to person-hours paid. The following is a brief explanation of the method of imputation for person-hours and employees in small establishments.

The number of person-hours paid is calculated by dividing the wages and salaries reported by the estimated average hourly earnings for the relevant industry and province.

The number of person-hours worked is calculated using the appropriate ratio of person-hours worked to person-hours paid.

The number of employees is calculated using the appropriate average person-hours paid per year. (If the total person-hours paid for an establishment is the equivalent of less than 0.5 employee per year, then no employees are imputed but the person-hours figures are retained for the industry.)

Total employees are distributed into male and female using relevant ratios. All employees of these small firms are considered to be production workers engaged in manufacturing activity except in the case of SIC's 2831 and 2839 (publishing), where they are considered to be administrative, office and other non-manufacturing employees.

Although small establishments accounted for 69.0% of the total number of establishments in 1986, their wages and salaries were only 11.2%, and their manufactured shipments only 8.0% of the totals for all manufacturing. The number of employees for these establishments, based on the imputation procedures described above, was 308,337 or 17.0% of all employees accounted for in the 1986 Census of Manufactures.

Working Owners and Partners

Effective with the Year 1985, the publication of this statistic has been discontinued.

Changes in "Cost of Materials, Supplies and Goods for Resale"

Effective with the year 1976, the "Cost of materials, supplies and goods for resale" shown under Total Activity reflects a slight change in methods. Previously this statistic included **purchases** of goods

dans d'autres représentent tous les établissements et non pas seulement les grands établissements, comme c'était le cas auparavant (depuis 1970). Pour l'année 1986, ces petits établissements n'ont consommé que 4.6% du total des dépenses pour le combustible et l'électricité.

Imputation des heures-personnes et des effectifs des petits établissements

Comme il est mentionné dans les "Notes explicatives", à partir de 1970, les effectifs des petits établissements sont imputés à partir des traitements et salaires déclarés; cette règle s'applique également aux heures-personnes rémunérées. Voici une brève explication de la méthode utilisée pour imputer les heures-personnes et les effectifs des petits établissements.

Le nombre d'heures-personnes est établi en divisant les traitements et salaires déclarés par les gains horaires moyens estimés dans l'industrie ou la province en question.

Le nombre d'heures-personnes travaillées est calculé à l'aide du rapport entre les heures-personnes travaillées et les heures-personnes rémunérées.

Le nombre de salariés est établi à partir de la moyenne annuelle des heures-personnes rémunérées. (Si le total des heures-personnes rémunérées d'un établissement équivaut à moins de 0.5 salarié par année, aucune imputation n'est faite, mais on conservera le chiffre des heures-personnes rémunérées au niveau de l'industrie.)

Le nombre total de salariés est réparti selon le sexe à l'aide des rapports appropriés. Tous les salariés de ces petites entreprises sont considérés comme étant des travailleurs de la production participant à l'activité manufacturière, à l'exception de ceux des classes 2831 et 2839 de la CTI (édition), qui sont des employés administratifs, de bureau et autres non préposés à la fabrication.

Bien que les petits établissements représentaient 69.0% du nombre total d'établissements en 1986, leurs traitements et salaires n'ont atteint que 11.2%, et leurs livraisons manufacturières 8.0%, de ceux de toute l'activité manufacturière. L'effectif de ces établissements, calculé à partir des méthodes d'imputation présentées ci-dessus, s'est chiffré à 308,337 ou 17.0% de tous les salariés déclarés au recensement des manufactures pour 1986.

Données sur les propriétaires et associés actifs

Commençant avec l'année 1985, la publication de cette statistique a été abandonnée.

Modifications apportées au "coût des matières, des fournitures et des marchandises destinées à la revente"

A compter de 1976, le "coût des matières, des fournitures et des marchandises destinées à la revente" montré sous la catégorie de l'activité totale reflète un léger changement de méthode. Auparavant cette statistique comprenait les **achats**

for resale in the same condition as purchased; now cost of goods sold with respect to such activity is included instead, thus removing the effect of changes in inventories of such goods on the cost of materials reported. ("Value added, total activity", was always calculated so as to exclude distortions from fluctuations in these inventories.)

Confidentiality of Data for Individual Businesses

Statistics Canada is prohibited by law from publishing any statistics which would divulge information relating to any identifiable business without the previous consent in writing of that business. In practice, this means that, for the Census of Manufactures, no data except for number, type and location of establishments are shown for industrial or geographic aggregations composed of fewer than three companies or of three or more if these are dominated by one or two companies. The names and employment size codes of large establishments classified to individual manufacturing industries were published in the relevant Census of Manufactures industry report up to 1984. Starting with the year 1985, these lists will be appearing in the 20 new publications which will show commodity and other data for the 22 major industry groups.

In order to provide a systematic publication pattern which will prevent indirect (or residual) disclosure of information relating to individual establishments, choices must often be made between the publication or suppression of different levels of industrial or geographic data. Such decisions are made in accordance with an order of precedence designed to provide as detailed data as possible consistent with provisions of the Statistics Act and with requirements for industrial and regional analysis. Thus, for individual industries, Canada is given precedence over provinces. Within provinces or regions, two-digit industry major groups are normally given precedence over their component three- and four-digit industries.

Where a choice must be made between publication of one three-digit industry and one or more of its constituent four-digit industries, factors such as the economic significance of the industry in the province or region and maintenance of historical continuity are taken into consideration. For example a four-digit industry (e.g., SIC 2512 – Sawmill and Planing Mill Products Industry) may be given preference over its three-digit "parent" (SIC 251 – Sawmill, Planing Mill and Shingle Mill Products Industries) because the former is considered more meaningful and there is relatively little difference between the total for SIC's 2512 and 251.

de produits pour la revente dans l'état où ils ont été achetés; maintenant **le coût des marchandises vendues** en ce qui concerne l'activité totale est désormais compris à la place, de façon à éliminer l'effet des changements dans les inventaires de telles marchandises sur le coût des matières. ("La valeur ajoutée, activité totale", a toujours été calculée de façon à exclure les distortions entraînées par les fluctuations dans les inventaires.)

Confidentialité des données présentées par les entreprises particulières

La loi interdit à Statistique Canada de diffuser des données qui pourraient servir à identifier une entreprise, sans avoir obtenu au préalable l'autorisation écrite de cette dernière. Du point de vue pratique, cela signifie qu'aux fins du recensement des manufactures, aucune donnée, à l'exception du nombre, du genre et de l'emplacement des établissements, n'est publiée sur des groupements industriels ou géographiques de moins de trois entreprises, ou de trois entreprises ou plus, que dominent une ou deux sociétés. Le nom et le code de taille d'effectif des grands établissements faisant partie des industries manufacturières particulières ont figuré dans la publication appropriée du recensement des manufactures jusqu'en 1984. À partir de 1985, ces listes paraîtront dans les 20 nouvelles publications qui présenteront les statistiques par type de produit et d'autres données pour les 22 grands groupes d'industries.

Afin de produire une méthode systématique de publication des données qui empêche la divulgation indirecte (ou par recoupement) de renseignements relatifs aux établissements particuliers, on doit souvent choisir entre la diffusion ou la suppression de divers niveaux de données industrielles ou géographiques. À cette fin, on a conçu un ordre de priorité nous permettant de produire quand même des données très détaillées qui respectent les dispositions de la Loi sur la statistique et les besoins en analyse au niveau de l'industrie ou de la région. Pour ce qui est des industries particulières, les données pour le Canada ont priorité sur celles des provinces. Dans le cas des provinces et des régions, les statistiques des grands groupes d'industries à deux chiffres passent habituellement avant celles de leurs composantes à trois et quatre chiffres.

Si l'on doit choisir entre les données d'une industrie à trois chiffres et celles d'une ou de plusieurs de ses composantes à quatre chiffres, on tient compte, entre autres choses, de l'impact économique de cette industrie dans la province ou la région et de la continuité chronologique des données. Ainsi, une industrie à quatre chiffres (par ex., CTI 2512 – Industrie des produits de scieries et d'ateliers de rabotage) peut avoir priorité sur l'industrie mère (CTI 251 – Scieries, ateliers de rabotage et usines de bardeaux) du fait qu'elle soit plus représentative et qu'on ne constate qu'une différence relativement faible entre les totaux de la classe 251 et ceux de la sous-classe 2512.

Additivity of Data

The user is cautioned against adding data from Table 3 or the equivalent regional and provincial tables in a manner resulting in double counting. In order to maximize the amount of data publishable within the confidentiality provisions of the Statistics Act, statistics are shown not only for three-digit industries but for as many of their four-digit components as possible. Care must therefore be taken, when adding data to the two digit level, not to add figures for both three-digit industries and their four-digit components.

More Recent Data

A summary report of this nature is necessarily less up-to-date than the bulletins on individual industries, issued one by one as data on particular industries become complete for the current Census of Manufactures. Prior to release of each bulletin, advance summary information on individual industries is published in the Statistics Canada Daily.

Current estimates of the values of shipments of goods of own manufacture are published each month in Monthly Survey of Manufacturing (Catalogue 31-001). Along with estimated values of inventories and orders where applicable, the shipments values are published in that report for the 22 industry groups within the manufacturing sector and for many three-digit or four-digit manufacturing industries. Among other series in the publication are estimates of the total values of shipments of goods of own manufacture in all provinces, except Prince Edward Island and the Territories, and for many industry groups within the provinces. These preliminary estimates, based on a monthly survey of manufacturers, are available about seven weeks after the end of the month of reference. Each year when annual Census of Manufactures data become available, all series are adjusted to the new census totals.

Data in CANSIM

Selected data on the principal statistics as published in this report are available in CANSIM.

Data for Canada only are available for the years 1961 to 1971 based on the 1960 SIC (CANSIM matrices 3300 to 3318).

Data for Canada, the provinces and the Atlantic, Prairie and Northern regions are available for the years 1970 to 1982 based on the 1970 SIC (CANSIM matrices 7481 to 7710).

Selected data for Canada by industry and for the provinces by major industry group are shown on the basis of the 1980 SIC from 1983 on (CANSIM matrices starting at 5378). Data for 1982 and 1981, restated to the 1980 SIC, have also been entered into these new matrices.

Caractère additif des tableaux

Le lecteur devra veiller à ne pas compter certaines données en double en additionnant les données du tableau 3 ou celles des tableaux provinciaux et régionaux correspondants. Dans le but d'accroître le nombre de données publiables tout en respectant les exigences de confidentialité de la Loi sur la statistique, on a produit des statistiques non seulement pour les industries à trois chiffres, mais également pour le plus grand nombre possible de leurs composantes à quatre chiffres. On doit donc prendre garde, lorsque l'on additionne des données relatives aux industries à deux chiffres, de ne pas inclure les chiffres se rapportant aux industries à trois chiffres et à leurs composantes à quatre chiffres.

Statistiques plus récentes

Une publication récapitulative comme celle-ci ne peut évidemment pas donner de statistiques aussi récentes que les bulletins consacrés aux industries particulières, qui paraissent au fur et à mesure que les données du recensement des manufactures pour une industrie sont complètes. Avant la sortie de chaque bulletin, des renseignements préliminaires sur les industries particulières sont publiés dans le Quotidien de Statistique Canada.

Les estimations courantes de la valeur des livraisons de produits de propre fabrication paraissent chaque mois dans la publication Enquête mensuelle sur les industries manufacturières (n° 31-001 au catalogue). Outre les estimations de la valeur des stocks et des commandes, la publication présente la valeur des livraisons des 22 groupes d'industries du secteur manufacturier et de plusieurs industries manufacturières à trois ou quatre chiffres. Les autres séries de la publication illustrent la valeur estimative totale des livraisons de produits de propre fabrication dans toutes les provinces, sauf à l'Île-du-Prince-Édouard et les Territoires, et pour de nombreux groupes d'industries dans les provinces. Ces estimations préliminaires, qui sont fondées sur une enquête mensuelle auprès des fabricants, paraissent environ sept semaines après la fin du mois de référence. Chaque année, lors de la parution des données du recensement des manufactures, toutes les séries sont rectifiées selon les nouveaux totaux obtenus.

Données dans CANSIM

Certaines statistiques principales du présent bulletin peuvent être extraites du CANSIM.

Les données se rapportant au Canada seulement peuvent être obtenues pour les années 1961 à 1971 selon la CTI de 1960 (CANSIM: Matrices 3300 à 3318).

Les données relatives au Canada, aux provinces ainsi qu'aux régions de l'Atlantique, des Prairies et du Nord sont disponibles pour les années de 1970 à 1982 selon la CAÉ de 1970 (CANSIM: Matrices 7481 à 7710).

Certaines statistiques peuvent être obtenues pour les années à partir de 1983 selon la CTI de 1980 (matrices dans CANSIM à partir de 5378) pour le Canada par industrie et pour les provinces par grand groupe d'industries. Certaines données pour 1982 et 1981, révisées en concordance avec la CTI de 1980, font aussi partie de ces nouvelles matrices.

Census of Manufactures Computer Tapes

Principal statistics of the Census of Manufactures are available for Canada and the provinces on computer tape from the Industry Division. The tape available contains data for Canada, the provinces, the Atlantic region, the Prairie region and the Yukon and Northwest Territories for the years 1961 to 1971, inclusive, on the 1960 SIC basis (including modifications); for the years from 1970 to 1982 on the 1970 SIC basis; and for the years from 1982 to the current data on the 1980 SIC basis. Data available on the tape are those published in the main tables of this report, (plus inventory and hours worked figures), by industry and industry group.

For further information concerning these tapes and their cost, contact the Information and Classification Services Section, Industry Division, Statistics Canada, Ottawa, K1A 0T6 (telephone: 951-9497).

Bandes d'ordinateur produites à partir du recensement des manufactures

La Division de l'industrie reproduira sur une bande les statistiques principales du recensement des manufactures pour le Canada et les provinces. Les chiffres se rapportent au Canada, aux provinces, aux régions de l'Atlantique et des Prairies ainsi qu'au Yukon et aux Territoires du Nord-Ouest, pour la période allant de 1961 à 1971 inclusivement et sont fondés sur la CTI de 1960 (y compris les modifications); les statistiques de 1970 à 1982 ont pour base la CAÉ de 1970; et les statistiques de 1982 jusqu'aux données actuelles ont pour base la CTI de 1980. Les données sur bande sont tirées des principaux tableaux de cette publication, (avec l'addition des données des stocks et des heures travaillées) selon l'industrie et le groupe d'industries.

Pour plus de renseignements sur ces bandes et leur prix, veuillez vous adresser à la Section des services d'information et de classification, Division de l'industrie, Statistique Canada, Ottawa, K1A 0T6 (téléphone: 951-9497).

¹ For statistics covering the period 1917-1960, see the 1973 and earlier issues of this report. Data for the 1957-1969 period are compiled on the basis of the 1960 Standard Industrial Classification; for 1970 to 1982 on the 1970 Standard Industrial Classification and for 1982 (revised) and subsequent years, on the 1980 Standard Industrial Classification. See the "Introduction" for further details.

¹ Les statistiques de la période 1917-1960 paraissent dans les publications de 1973 et antérieures. Les données de la période 1957-1969 sont rassemblées en fonction de la Classification type des industries de 1960, celles de 1970 à 1982 en fonction de la Classification des activités économiques de 1970, tandis que celles de 1982 (révisées) et des années suivantes le sont à partir de la Classification type des industries de 1980. Pour plus de renseignements, consulter l'introduction de la présente publication.

² From 1970-1981 inclusive, the cost of fuel and electricity was not collected separately for small firms and was included in the cost of materials and supplies used. De 1970 à 1981 inclusivement, le coût du combustible et de l'électricité n'était pas recueilli séparément auprès des petits établissements et était compris dans le coût des matières et fournitures utilisées.

³ Beginning with 1961, when statistics were first published for "Manufacturing activity" and "Total activity", data on "Number" and "Salaries and wages" under "Total employees" are not directly comparable with earlier statistics under the same headings.

³ À partir de 1961 (première fois où les statistiques ont été publiées pour l'Activité manufacturière et l'Activité totale), les données sur le "Nombre" et les "Traitements et salaires" sous "Total des salariés" ne sont donc pas comparables à celles qui figuraient précédemment aux mêmes rubriques.

⁴ Data for 1982 restated to the 1980 revision of the Standard Industrial Classification.

⁴ Les données de 1982 révisées en concordance avec la Classification type des industries de 1980.

¹ For statistics covering the period 1949-1960, see the 1973 and earlier issues of this report. Data for the 1957-1969 period are compiled on the basis of the 1960 Standard Industrial Classification; for 1970 to 1982 on the 1970 Standard Industrial Classification and for 1982 (restated) and subsequent years, on the 1980 Standard Industrial Classification. See the "Introduction" for further details.

¹ Les statistiques de la période 1949-1960 paraissent dans les publications de 1973 et antérieures. Les données de la période 1957-1969 sont rassemblées en fonction de la Classification type des industries de 1960, celles de 1970 à 1982 en fonction de la Classification des activités économiques de 1970, tandis que celles de 1982 (révisées) et des années suivantes le sont à partir de la Classification type des industries de 1980. Pour plus de renseignements, consulter l'introduction de la présente publication.

² From 1970-1981 inclusive, the cost of fuel and electricity was not collected separately for small firms and was included in the cost of materials and supplies used.

² De 1970 à 1981 inclusivement, le coût du combustible et de l'électricité n'était pas recueilli séparément auprès des petits établissements et était compris dans le coût des matières et fournitures utilisées.

³ Beginning with 1961, when statistics were first published for "Manufacturing activity" and "Total activity", data on "Number" and "Salaries and wages" under "Total employees" are not directly comparable with earlier statistics under the same headings.

³ À partir de 1961 (première fois où les statistiques ont été publiées pour l'«Activité manufacturière» et l'«Activité totale»), les données sur le «Nombre» et les «Traitements et salaires» sous «Total des salariés» ne sont donc pas comparables à celles qui figuraient précédemment aux mêmes rubriques.

⁴ Data for 1982 restated to the 1980 revision of the Standard Industrial Classification.

⁴ Les données de 1982 révisées en concordance avec la Classification type des industries de 1980.

¹ For statistics covering the period 1949-1960, see the 1973 and earlier issues of this report. Data for the 1957-1969 period are compiled on the basis of the 1960 Standard Industrial Classification; for 1970 to 1982 on the 1970 Standard Industrial Classification and for 1982 (restated) and subsequent years, on the 1980 Standard Industrial Classification. See the "Introduction" for further details.

¹ Les statistiques de la période 1949-1960 paraissent dans les publications de 1973 et antérieures. Les données de la période 1957-1969 sont rassemblées en fonction de la Classification type des industries de 1960, celles de 1970 à 1982 en fonction de la Classification des activités économiques de 1970, tandis que celles de 1982 (révisées) et des années suivantes le sont à partir de la Classification type des industries de 1980. Pour plus de renseignements, consulter l'introduction de la présente publication.

² Beginning with 1961, when statistics were first published for "Manufacturing activity" and "Total activity", data on "Number" and "Salaries and wages" under "Total employees" are not directly comparable with earlier statistics under the same headings.

² De 1970 à 1981 inclusivement, le coût du combustible et de l'électricité n'était pas recueilli séparément auprès des petits établissements et était compris dans le coût des matières et fournitures utilisées.

³ A partir de 1961 (première fois où les statistiques ont été publiées pour l' "Activité manufacturière" et l' "Activité totale"), les données sur le "Nombre" et les "Traitements et salaires" sous "Total des salariés" ne sont donc pas comparables à celles qui figuraient précédemment aux mêmes rubriques.

⁴ Data for 1982 restated to the 1980 revision of the Standard Industrial Classification.

⁴ Les données de 1982 révisées en concordance avec la Classification type des industries de 1980.

¹ For statistics covering the period 1931-1960, see the 1973 and earlier issues of this report. Data for the 1957-1969 period are compiled on the basis of the 1960 Standard Industrial Classification; for 1970 to 1982 on the 1970 Standard Industrial Classification and for 1982 (revised) and subsequent years, on the 1980 Standard Industrial Classification. See the "Introduction" for further details.

¹ Les statistiques de la période 1931-1960 paraissent dans les publications de 1973 et antérieures. Les données de la période 1957-1969 sont rassemblées en fonction de la Classification type des industries de 1960, celles de 1970 à 1982 en fonction de la Classification des activités économiques de 1970, tandis que celles de 1982 (révisées) et des années suivantes le sont à partir de la Classification type des industries de 1980. Pour plus de renseignements, consulter l'introduction de la présente publication.

² From 1970-1981 inclusive, the cost of fuel and electricity was not collected separately for small firms and was included in the cost of materials and supplies used.

² De 1970 à 1981 inclusivement, le coût du combustible et de l'électricité n'était pas recueilli séparément auprès des petits établissements et était compris dans le coût des matières et fournitures utilisées.

³ Beginning with 1961, when statistics were first published for "Manufacturing activity" and "Total activity", data on "Number" and "Salaries and wages" under "Total employees" are not directly comparable with earlier statistics under the same headings.

³ À partir de 1961 (première fois où les statistiques ont été publiées pour l'Activité manufacturière et l'Activité totale), les données sur le "Nombre" et les "Traitements et salaires" sous "Total des salariés" ne sont donc pas comparables à celles qui figuraient précédemment aux mêmes rubriques.

⁴ Data for 1982 restated to the 1980 revision of the Standard Industrial Classification.

⁴ Les données de 1982 révisées en concordance avec la Classification type des industries de 1980.

¹ For statistics covering the period 1931-1960, see the 1973 and earlier issues of this report. Data for the 1957-1969 period are compiled on the basis of the 1960 Standard Industrial Classification; for 1970 to 1982 on the 1970 Standard Industrial Classification and for 1982 (revised) and subsequent years, on the 1980 Standard Industrial Classification. See the "introduction" for further details.

¹ Les statistiques de la période 1931-1960 paraissent dans les publications de 1973 et antérieures. Les données de la période 1957-1969 sont rassemblées en fonction de la Classification type des industries de 1960, celles de 1970 à 1982 en fonction de la Classification des activités économiques de 1970, tandis que celles de 1982 (révisées) et des années suivantes le sont à partir de la Classification type des industries de 1980. Pour plus de renseignements, consulter l'introduction de la présente publication.

² From 1970-1981 inclusive, the cost of fuel and electricity was not collected separately for small firms and was included in the cost of materials and supplies used.

² De 1970 à 1981 inclusivement, le coût du combustible et de l'électricité n'était pas recueilli séparément auprès des petits établissements et était compris dans le coût des matières et fournitures utilisées.

³ Beginning with 1961, when statistics were first published for "Manufacturing activity" and "Total activity", data on "Number" and "Salaries and wages" under "Total employees" are not directly comparable with earlier statistics under the same headings.

³ À partir de 1961 (première fois où les statistiques ont été publiées pour l' "Activité manufacturière" et l' "Activité totale"), les données sur le "Nombre" et les "Traitements et salaires" sous "Total des salariés" ne sont donc pas comparables à celles qui figuraient précédemment aux mêmes rubriques.

⁴ Data for 1982 restated to the 1980 revision of the Standard Industrial Classification.

⁴ Les données de 1982 révisées en concordance avec la Classification type des industries de 1980.

¹ For statistics covering the period 1931-1960, see the 1973 and earlier issues of this report. Data for the 1957-1969 period are compiled on the basis of the 1960 Standard Industrial Classification; for 1970 to 1982 on the 1970 Standard Industrial Classification and for 1982 (revised) and subsequent years, on the 1980 Standard Industrial Classification. See the "Introduction" for further details.

¹ Les statistiques de la période 1931-1960 paraissent dans les publications de 1973 et antérieures. Les données de la période 1957-1969 sont rassemblées en fonction de la Classification type des industries de 1960, celles de 1970 à 1982 en fonction de la Classification des activités économiques de 1970, tandis que celles de 1982 (révisées) et des années suivantes le sont à partir de la Classification type des industries de 1980. Pour plus de renseignements, consulter l'introduction de la présente publication.

² From 1970-1981 inclusive, the cost of fuel and electricity was not collected separately for small firms and was included in the cost of materials and supplies used.

² De 1970 à 1981 inclusivement, le coût du combustible et de l'électricité n'était pas recueilli séparément auprès des petits établissements et était compris dans le coût des matières et fournitures utilisées.

³ Beginning with 1961, when statistics were first published for "Manufacturing activity" and "Total activity", data on "Number" and "Salaries and wages" under "Total employees" are not directly comparable with earlier statistics under the same headings.

³ À partir de 1961 (première fois où les statistiques ont été publiées pour l'"Activité manufacturière" et l'"Activité totale"), les données sur le "Nombre" et les "Traitements et salaires" sous "Total des salariés" ne sont donc pas comparables à celles qui figuraient précédemment aux mêmes rubriques.

⁴ Data for 1982 restated to the 1980 revision of the Standard Industrial Classification.

⁴ Les données de 1982 révisées en concordance avec la Classification type des industries de 1980.

¹ For statistics covering the period 1931-1960, see the 1973 and earlier issues of this report. Data for the 1957-1969 period are compiled on the basis of the 1960 Standard Industrial Classification; for 1970 to 1982 on the 1970 Standard Industrial Classification and for 1982 (revised) and subsequent years, on the 1980 Standard Industrial Classification. See the "Introduction" for further details.

¹ Les statistiques de la période 1931-1960 paraissent dans les publications de 1973 et antérieures. Les données de la période 1957-1969 sont rassemblées en fonction de la Classification type des industries de 1960, celles de 1970 à 1982 en fonction de la Classification des activités économiques de 1970, tandis que celles de 1982 (révisées) et des années suivantes le sont à partir de la Classification type des industries de 1980. Pour plus de renseignements, consulter l'introduction de la présente publication.

² From 1970-1981 inclusive, the cost of fuel and electricity was not collected separately for small firms and was included in the cost of materials and supplies used.

² De 1970 à 1981 inclusivement, le coût du combustible et de l'électricité n'était pas recueilli séparément auprès des petits établissements et était compris dans le coût des matières et fournitures utilisées.

³ Beginning with 1961, when statistics were first published for "Manufacturing activity" and "Total activity", data on "Number" and "Salaries and wages" under "Total employees" are not directly comparable with earlier statistics under the same headings.

³ À partir de 1961 (première fois où les statistiques ont été publiées pour l'« Activité manufacturière » et l'« Activité totale »), les données sur le « Nombre » et les « Traitements et salaires » sous « Total des salariés » ne sont donc pas comparables à celles qui figuraient précédemment aux mêmes rubriques.

⁴ Data for 1982 restated to the 1980 revision of the Standard Industrial Classification.

⁴ Les données de 1982 révisées en concordance avec la Classification type des industries de 1980.

¹ For statistics covering the period 1931-1960, see the 1973 and earlier issues of this report. Data for the 1957-1969 period are compiled on the basis of the 1960 Standard Industrial Classification; for 1970 to 1982 on the 1970 Standard Industrial Classification and for 1982 (restated) and subsequent years, on the 1980 Standard Industrial Classification. See the "Introduction" for further details.

¹ Les statistiques de la période 1931-1960 paraissent dans les publications de 1973 et antérieures. Les données de la période 1957-1969 sont rassemblées en fonction de la Classification type des industries de 1960, celles de 1970 à 1982 en fonction de la Classification des activités économiques de 1970, tandis que celles de 1982 (révisées) et des années suivantes le sont à partir de la Classification type des industries de 1980. Pour plus de renseignements, consulter l'introduction de la présente publication.

² From 1970-1981 inclusive, the cost of fuel and electricity was not collected separately for small firms and was included in the cost of materials and supplies used.

² De 1970 à 1981 inclusivement, le coût du combustible et de l'électricité n'était pas recueilli séparément auprès des petits établissements et était compris dans le coût des matières et fournitures utilisées.

³ Beginning with 1961, when statistics were first published for "Manufacturing activity" and "Total activity", data on "Number" and "Salaries and wages" under "Total employees" are not directly comparable with earlier statistics under the same headings.

³ À partir de 1961 (première fois où les statistiques ont été publiées pour l'"Activité manufacturière" et l'"Activité totale"), les données sur le "Nombre" et les "Traitements et salaires" sous "Total des salariés" ne sont donc pas comparables à celles qui figuraient précédemment aux mêmes rubriques.

⁴ Data for 1982 restated to the 1980 revision of the Standard Industrial Classification.

⁴ Les données de 1982 révisées en concordance avec la Classification type des industries de 1980.

¹ For statistics covering the period 1931-1960, see the 1973 and earlier issues of this report. Data for the 1957-1969 period are compiled on the basis of the 1960 Standard Industrial Classification; for 1970 to 1982 on the 1970 Standard Industrial Classification and for 1982 (revised) and subsequent years, on the 1980 Standard Industrial Classification. See the "Introduction" for further details.

¹ Les statistiques de la période 1931-1960 paraissent dans les publications de 1973 et antérieures. Les données de la période 1957-1969 sont rassemblées en fonction de la Classification type des industries de 1960, celles de 1970 à 1982 en fonction de la Classification des activités économiques de 1970, tandis que celles de 1982 (révisées) et des années suivantes le sont à partir de la Classification type des industries de 1980. Pour plus de renseignements, consulter l'introduction de la présente publication.

² From 1970-1981 inclusive, the cost of fuel and electricity was not collected separately for small firms and was included in the cost of materials and supplies used.

² De 1970 à 1981 inclusivement, le coût du combustible et de l'électricité n'était pas recueilli séparément auprès des petits établissements et était compris dans le coût des matières et fournitures utilisées.

³ Beginning with 1961, when statistics were first published for "Manufacturing activity" and "Total activity", data on "Number" and "Salaries and wages" under "Total employees" are not directly comparable with earlier statistics under the same headings.

³ À partir de 1961 (première fois où les statistiques ont été publiées pour l'"Activité manufacturière" et l'"Activité totale"), les données sur le "Nombre" et les "Traitements et salaires" sous "Total des salariés" ne sont donc pas comparables à celles qui figuraient précédemment aux mêmes rubriques.

⁴ Data for 1982 restated to the 1980 revision of the Standard Industrial Classification.

⁴ Les données de 1982 révisées en concordance avec la Classification type des industries de 1980.

¹ For statistics covering the period 1931-1960, see the 1973 and earlier issues of this report. Data for the 1957-1969 period are compiled on the basis of the 1960 Standard Industrial Classification; for 1970 to 1982 on the 1970 Standard Industrial Classification and for 1982 (revised) and subsequent years, on the 1980 Standard Industrial Classification. See the "Introduction" for further details.

¹ Les statistiques de la période 1931-1960 paraissent dans les publications de 1973 et antérieures. Les données de la période 1957-1969 sont rassemblées en fonction de la Classification type des industries de 1960, celles de 1970 à 1982 en fonction de la Classification des activités économiques de 1970, tandis que celles de 1982 (révisées) et des années suivantes le sont à partir de la Classification type des industries de 1980. Pour plus de renseignements, consulter l'introduction de la présente publication.

² From 1970-1981 inclusive, the cost of fuel and electricity was not collected separately for small firms and was included in the cost of materials and supplies used.

² De 1970 à 1981 inclusivement, le coût du combustible et de l'électricité n'était pas recueilli séparément auprès des petits établissements et était compris dans le coût des matières et fournitures utilisées.

³ Beginning with 1961, when statistics were first published for "Manufacturing activity" and "Total activity", data on "Number" and "Salaries and wages" under "Total employees" are not directly comparable with earlier statistics under the same headings.

³ À partir de 1961 (première fois où les statistiques ont été publiées pour l'«Activité manufacturière» et l'«Activité totale»), les données sur le «Nombre» et les «Traitements et salaires» sous «Total des salariés» ne sont donc pas comparables à celles qui figuraient précédemment aux mêmes rubriques.

⁴ Data for 1982 restated to the 1980 revision of the Standard Industrial Classification.

⁴ Les données de 1982 révisées en concordance avec la Classification type des industries de 1980.

¹ For statistics covering the period 1931-1960, see the 1973 and earlier issues of this report. Data for the 1957-1969 period are compiled on the basis of the 1960 Standard Industrial Classification; for 1970 to 1982 on the 1970 Standard Industrial Classification and for 1982 (revised) and subsequent years, on the 1980 Standard Industrial Classification. See the "Introduction" for further details.

¹ Les statistiques de la période 1931-1960 paraissent dans les publications de 1973 et antérieures. Les données de la période 1957-1969 sont rassemblées en fonction de la Classification type des industries de 1960, celles de 1970 à 1982 en fonction de la Classification des activités économiques de 1970, tandis que celles de 1982 (révisées) et des années suivantes le sont à partir de la Classification type des industries de 1980. Pour plus de renseignements, consulter l'introduction de la présente publication.

² From 1970-1981 inclusive, the cost of fuel and electricity was not collected separately for small firms and was included in the cost of materials and supplies used.

² De 1970 à 1981 inclusivement, le coût du combustible et de l'électricité n'était pas recueilli séparément auprès des petits établissements et était compris dans le coût des matières et fournitures utilisées.

³ Beginning with 1961, when statistics were first published for "Manufacturing activity" and "Total activity", data on "Number" and "Salaries and wages" under "Total employees" are not directly comparable with earlier statistics under the same headings.

³ À partir de 1961 (première fois où les statistiques ont été publiées pour l'"Activité manufacturière" et l'"Activité totale"), les données sur le "Nombre" et les "Traitements et salaires" sous "Total des salariés" ne sont donc pas comparables à celles qui figuraient précédemment aux mêmes rubriques.

⁴ Data for 1982 restated to the 1980 revision of the Standard Industrial Classification.

⁴ Les données de 1982 révisées en concordance avec la Classification type des industries de 1980.

¹ For statistics covering the period 1931-1960, see the 1973 and earlier issues of this report. Data for the 1957-1969 period are compiled on the basis of the 1960 Standard Industrial Classification; for 1970 to 1982 on the 1970 Standard Industrial Classification and for 1982 (restated) and subsequent years, on the 1980 Standard Industrial Classification. See the "introduction" for further details.

¹ Les statistiques de la période 1931-1960 paraissent dans les publications de 1973 et antérieures. Les données de la période 1957-1969 sont rassemblées en fonction de la Classification type des industries de 1960, celles de 1970 à 1982 en fonction de la Classification des activités économiques de 1970, tandis que celles de 1982 (révisées) et des années suivantes le sont à partir de la Classification type des industries de 1980. Pour plus de renseignements, consulter l'introduction de la présente publication.

² From 1970-1981 inclusive, the cost of fuel and electricity was not collected separately for small firms and was included in the cost of materials and supplies used.

² De 1970 à 1981 inclusivement, le coût du combustible et de l'électricité n'était pas recueilli séparément auprès des petits établissements et était compris dans le coût des matières et fournitures utilisées.

³ Beginning with 1961, when statistics were first published for "Manufacturing activity" and "Total activity", data on "Number" and "Salaries and wages" under "Total employees" are not directly comparable with earlier statistics under the same headings.

³ À partir de 1961 (première fois où les statistiques ont été publiées pour l'"Activité manufacturière" et l'"Activité totale"), les données sur le "Nombre" et les "Traitements et salaires" sous "Total des salariés" ne sont donc pas comparables à celles qui figuraient précédemment aux mêmes rubriques.

⁴ Data for 1982 restated to the 1980 revision of the Standard Industrial Classification.

⁴ Les données de 1982 révisées en concordance avec la Classification type des industries de 1980.

¹ For statistics covering the period 1931-1960, see the 1973 and earlier issues of this report. Data for the 1957-1969 period are compiled on the basis of the 1960 Standard Industrial Classification; for 1970 to 1982 on the 1970 Standard Industrial Classification and for 1982 (revised) and subsequent years, on the 1980 Standard Industrial Classification. See the "Introduction" for further details.

¹ Les statistiques de la période 1931-1960 paraissent dans les publications de 1973 et antérieures. Les données de la période 1957-1969 sont rassemblées en fonction de la Classification type des industries de 1960, celles de 1970 à 1982 en fonction de la Classification des activités économiques de 1970, tandis que celles de 1982 (révisées) et des années suivantes le sont à partir de la Classification type des industries de 1980. Pour plus de renseignements, consulter l'introduction de la présente publication.

² From 1970-1981 inclusive, the cost of fuel and electricity was not collected separately for small firms and was included in the cost of materials and supplies used.

² De 1970 à 1981 inclusivement, le coût du combustible et de l'électricité n'était pas recueilli séparément auprès des petits établissements et était compris dans le coût des matières et fournitures utilisées.

³ Beginning with 1961, when statistics were first published for "Manufacturing activity" and "Total activity", data on "Number" and "Salaries and wages" under "Total employees" are not directly comparable with earlier statistics under the same headings.

³ À partir de 1961 (première fois où les statistiques ont été publiées pour l' "Activité manufacturière" et l' "Activité totale"), les données sur le "Nombre" et les "Traitements et salaires" sous "Total des salariés" ne sont donc pas comparables à celles qui figuraient précédemment aux mêmes rubriques.

⁴ Data for 1982 restated to the 1980 revision of the Standard Industrial Classification.

⁴ Les données de 1982 révisées en concordance avec la Classification type des industries de 1980.

¹ For statistics covering the period 1931-1960, see the 1973 and earlier issues of this report. Data for the 1957-1969 period are compiled on the basis of the 1960 Standard Industrial Classification; for 1970 to 1982 on the 1970 Standard Industrial Classification and for 1982 (restated) and subsequent years, on the 1980 Standard Industrial Classification. See the "Introduction" for further details.

¹ Les statistiques de la période 1931-1960 paraissent dans les publications de 1973 et antérieures. Les données de la période 1957-1969 sont rassemblées en fonction de la Classification type des industries de 1960, celles de 1970 à 1982 en fonction de la Classification des activités économiques de 1970, tandis que celles de 1982 (révisées) et des années suivantes le sont à partir de la Classification type des industries de 1980. Pour plus de renseignements, consulter l'introduction de la présente publication.

² From 1970-1981 inclusive, the cost of fuel and electricity was not collected separately for small firms and was included in the cost of materials and supplies used.

² De 1970 à 1981 inclusivement, le coût du combustible et de l'électricité n'était pas recueilli séparément auprès des petits établissements et était compris dans le coût des matières et fournitures utilisées.

³ Beginning with 1961, when statistics were first published for "Manufacturing activity" and "Total activity", data on "Number" and "Salaries and wages" under "Total employees" are not directly comparable with earlier statistics under the same headings.

³ À partir de 1961 (première fois où les statistiques ont été publiées pour l'"Activité manufacturière" et l'"Activité totale"), les données sur le "Nombre" et les "Traitements et salaires" sous "Total des salariés" ne sont donc pas comparables à celles qui figuraient précédemment aux mêmes rubriques.

⁴ Data for 1982 restated to the 1980 revision of the Standard Industrial Classification.

⁴ Les données de 1982 révisées en concordance avec la Classification type des industries de 1980.

INFORMATION SHARING AGREEMENTS

To reduce response burden and to ensure more uniform statistics, Statistics Canada has entered into agreements with various government departments and agencies for the sharing of data:

Under Section 10 of the Canada Statistics Act, with the provincial statistical agencies of Newfoundland, Nova Scotia, New Brunswick, Quebec, Ontario, Manitoba, Saskatchewan, Alberta and British Columbia in respect of establishments located within the boundaries of their respective province. The Statistics Acts of these provinces include substantially the same provisions for confidentiality and penalties for disclosure of confidential information as the Canada Statistics Act.

Under Section 11 of the Canada Statistics Act, with the Prince Edward Island Department of Finance and Tourism for all establishments located within the province. Section 11 agreements shall not apply to your 1986 Census of Manufactures report(s) if an authorized officer or person of your company objects in writing to the Chief Statistician and mails that letter to the Industry Division, Statistics Canada together with the completed questionnaire.

1. AUTHORITY

The Annual Census of Manufactures is collected under the authority of The Statistics Act, Statutes of Canada, 1970-71-72, Chapter 15.

The Statistics Act gives Statistics Canada the right to access any returns, certificates, statements, documents or other records obtained on behalf of the Minister of National Revenue for purposes of the Income Tax Act. Any information thus obtained by Statistics Canada is to be used for statistical purposes only and is subject to the same rules of confidentiality as the information collected by Statistics Canada directly from respondents.

2. SECTION "D", TYPE OF ORGANIZATION

With respect to Section D, Type of Organization, we require the Social Insurance Numbers (SIN numbers) for individual ownerships and partnerships, or Corporation Account Numbers for corporations and co-operatives to be able to obtain information on your business in **future years** from Revenue Canada, wherever this is feasible. If we can make use of Revenue Canada data in respect of your business (and this will depend on the size of your business and other factors), then you may not be receiving another one of these questionnaires for 3 or 4 years. However, we must have the data requested on this form for **this** survey year at least, before we can consider collecting data for your business from Revenue Canada.

3. INFORMATION SHARING AGREEMENTS

To reduce response burden and to ensure more uniform statistics, Statistics Canada has entered into agreements with various government departments and agencies for the sharing of data:

— UNDER SECTION 10 OF THE CANADA STATISTICS ACT,

- with the provincial statistical agencies of Newfoundland, Nova Scotia, New Brunswick, Québec, Ontario, Manitoba, Saskatchewan, Alberta and British Columbia in respect of establishments located within the boundaries of their respective Provinces. The Statistics Acts of these Provinces include substantially the same provisions for confidentiality and penalties for disclosure of confidential information as the Canada Statistics Act.

— UNDER SECTION 11 OF THE CANADA STATISTICS ACT,

- with the Prince Edward Island Department of Industry and Tourism for all establishments located within the province. Use of the data is restricted to statistical purposes and the agreements require this group to maintain strict confidentiality of identifiable information relating to data reported.

with the Newfoundland and Labrador Department of Mines and Energy, New Brunswick Department of Natural Resources, Québec Ministry of Energy and Natural Resources, Ontario Ministry of Natural Resources, Manitoba Department of Energy and Mines, British Columbia Ministry of Energy, Mines and Petroleum Resources for all establishments located within their respective provincial boundaries, and with the Federal Department of Energy, Mines and Resources with respect to all establishments in the domestic clay products industry; and also with the Ontario Ministry of Natural Resources with respect to certain wood industries within that province. The agreements allow these agencies to put the information derived from this survey to the uses prescribed by their governing legislation.

Section 11 agreements shall not apply to your 1986 Census of Manufactures report(s) if an authorized officer or person of your company objects in writing to the Chief Statistician and mails that letter to the Industry Division of Statistics Canada together with the completed questionnaire. Please specify those agencies or departments listed above from which data shall be withheld.

1. LÉGALITÉ

Le recensement annuel des manufactures est effectué en vertu de la Loi sur la statistique, chapitre 15, Statuts du Canada de 1970-71-72.

La Loi sur la statistique autorise Statistique Canada à examiner les déclarations, certificats, états financiers, documents et autres registres obtenus par le ministère du Revenu en vertu de la Loi de l'impôt sur le revenu. L'information ainsi obtenue par Statistique Canada ne doit servir qu'à des fins statistiques et doit être tenue confidentielle au même titre que les données recueillies directement auprès des enquêtés par Statistique Canada.

2. SECTION "D", FORME D'ORGANISATION

En ce qui a trait à la section D, Forme d'organisation, vous devez nous fournir votre numéro d'assurance sociale (NAS) pour entreprises individuelles et sociétés en nom collectif, ou votre numéro de compte de corporation pour entreprises constituées en corporation et coopératives afin de nous permettre d'obtenir à l'avenir auprès de Revenu Canada les données concernant votre entreprise. S'il nous est possible d'utiliser les données de Revenu Canada (cela dépend de la taille de votre entreprise et d'autres facteurs), vous n'aurez peut-être pas à remplir un autre questionnaire de ce genre avant 3 ou 4 ans. Toutefois, vous devez nous fournir les renseignements demandés sur cette formule concernant au moins la présente année d'enquête avant que nous puissions envisager de recueillir les données auprès de Revenu Canada.

3. ENTENTES DE PARTAGE DES DONNÉES

Pour alléger le fardeau de réponse et assurer des statistiques plus uniformes, Statistique Canada a conclu des ententes avec divers ministères et organismes publics en vue d'un échange de données:

— EN VUE DE L'ARTICLE 10 DE LA LOI SUR LA STATISTIQUE DU CANADA,

- avec les bureaux statistiques provinciaux de Terre-Neuve, de la Nouvelle-Écosse, du Nouveau-Brunswick, du Québec, de l'Ontario, du Manitoba, de la Saskatchewan, de l'Alberta et de la Colombie-Britannique en ce qui a trait aux établissements situés à l'intérieur des limites de leur territoire respectif. Les lois sur la statistique de ces provinces prévoient, à peu de choses près, les mêmes dispositions que la Loi fédérale sur la statistique en ce qui a trait à la confidentialité et les mêmes sanctions contre la divulgation des renseignements.

— EN VERTU DE L'ARTICLE 11 DE LA LOI SUR LA STATISTIQUE DU CANADA,

- avec le ministère de l'Industrie et du Tourisme de l'Île-du-Prince-Édouard pour tous les établissements situés dans la province. Les données ne peuvent servir qu'à des fins statistiques et les parties liées par les ententes doivent garder strictement confidentiels les renseignements identifiables découlant des données déclarées.

Avec le ministère des Mines et de l'Énergie de Terre-Neuve et du Labrador, les ministères des Ressources naturelles du Nouveau-Brunswick et de l'Ontario, le ministère de l'Énergie et des Ressources naturelles du Québec, le ministère de l'Énergie et des Mines du Manitoba, le ministère de l'Énergie, des Mines et des Ressources pétrolières de la Colombie-Britannique, pour tous les établissements situés à l'intérieur de leurs limites provinciales respectives, et avec le ministère fédéral de l'Énergie, des Mines et des Ressources en ce qui a trait à l'ensemble des établissements de l'industrie des produits en argile (argile canadienne). Aussi avec le ministère des Ressources naturelles de l'Ontario pour les établissements classés à certaines industries de première transformation du bois, dans cette province. Les ententes permettent à ces ministères d'utiliser l'information obtenue de cette enquête à des fins permises par leur législation respective.

Les ententes conclues en vertu de l'article 11 ne s'appliqueront pas à vos déclarations pour le recensement des manufactures de 1986 si un agent ou une personne autorisée de votre société signifie au statisticien en chef, par écrit, qu'il s'y oppose et envoie sa lettre accompagnée du questionnaire dûment rempli à la Division de l'industrie de Statistique Canada. Veuillez préciser les organismes susmentionnés auxquels il ne faut pas communiquer les données.

The Annual Census of Manufactures is collected under the authority of The Statistics Act, Statutes of Canada, 1970-71-72, Chapter 15. To reduce response burden and to insure more uniform statistics, Statistics Canada has entered into an agreement for the sharing of data with the Québec Bureau de Statistique under section 10 of the Canada Statistics Act.

The Statistics Act of this province includes substantially the same provisions for confidentiality and penalties for disclosure of confidential information as the Canada Statistics Act.

Also, under Section 11 of the Canada Statistics Act, data sharing agreements have been entered into with the Québec Ministry of Energy and Natural Resources, and with the Federal Department of Energy, Mines and Resources with respect to all establishments in the Domestic Clay Products industry. The agreements allow these agencies to put the information derived from this survey to the uses prescribed by their governing legislation.

Section 11 agreements shall not apply to your 1986 Census of Manufactures report(s) if an authorized officer or person of your company objects in writing to the Chief Statistician and mails that letter to the Industry Division of Statistics Canada together with the completed questionnaire. Le recensement annuel des manufactures est effectué en vertu de la Loi sur la statistique, chapitre 15, Statuts du Canada de 1970-71-72. Pour alléger le fardeau de réponse et assurer des statistiques plus uniformes, Statistique Canada a conclu une entente en vue d'un échange de données avec le Bureau de la Statistique du Québec en vertu de l'article 10 de la Loi sur la statistique du Canada.

La Loi statistique de cette province renferme à peu près les mêmes dispositions que la Loi sur la statistique du Canada en ce qui a trait au caractère confidentiel des données et aux sanctions prévues en cas de divulgation.

Aussi en vertu de l'article 11 de la Loi sur la statistique du Canada, Statistique Canada a conclu des ententes en vue d'un échange de données avec le ministère d'Énergie et Ressources naturelles du Québec et avec le ministère fédéral de l'Énergie, des Mines et des Ressources en ce qui a trait à l'ensemble des établissements de l'industrie des produits en argile (argile canadienne). Les ententes permettent à ces ministères d'utiliser l'information obtenue de cette enquête à des fins permises par leur législation respective.

Les ententes conclues en vertu de l'article 11 ne s'appliqueront pas à vos déclarations pour le recensement des manufactures de 1986 si un agent ou une personne autorisée de votre société signifie au statisticien en chef, par écrit, qu'il s'y oppose et envoie sa lettre accompagnée du questionnaire dûment rempli à la Division de l'industrie de Statistique Canada. Veuillez préciser les organismes ou ministères susmentionnés auxquels il ne faut pas communiquer les données.

EXPLANATORY NOTES

The following abbreviated notes deal only with salient points or selected inclusions or exclusions which might not be self-evident. Further information may be obtained from the Analysis and Development Section, Industry Division, Statistics Canada, Ottawa, Ontario, K1A 0T6.

Establishment. The smallest unit capable of reporting certain specified input and output data; usually a plant or mill. Numbers for 1975 declined owing to the exclusion of existing establishments deemed to have no paid employees. Principal statistics of an establishment active in more than one municipality are prorated to "quasi-establishment" locations, which are treated as establishments in compilations.

Reporting period. Any fiscal year ending not earlier than April 1 of the reference year nor later than March 31 the following year.

Cost of materials and supplies. Generally, consumption of purchased items only at laid-down cost including transportation and handling charges, excise duties, etc. Includes transfers between units of the same company and work done on contract by others. At the manufacturing activity level, this item represents purchased items used in manufacturing operations.

Cost of fuel and electricity. Consumption of purchased fuel and electricity only, at laid-down cost including transportation and handling charges, excise duties, etc. Data for non-manufacturing activity included under manufacturing activity except where an ancillary office uses a separate "head office" report. In this latter case the fuel reported is included under cost of materials for "Total Activity" only.

Value of shipments of goods of own manufacture. Net selling value of goods made by reporting establishment, or for its account, from its own materials. Excludes discounts, returns, allowances, sales tax, excise taxes and duties, returnable containers, common or contract carriers' charges for outward transportation (but not own carriers' delivery expense). Includes repair and custom revenue, transfers to reporting units of same firm, all exports, book value of own products shipped the first time on a rental basis. Includes consignment shipments to other countries, but domestic consignment shipments are included in inventory until sold.

Value added. Net output as measured by gross output less purchased commodity inputs used and contract work by others.

Value added, manufacturing activity: value of shipments of goods of own manufacture plus net change in inventory of goods in process and finished goods, less cost of materials and supplies used, fuel and electricity.

NOTES EXPLICATIVES

Les notes succinctes ci-après s'appliquent uniquement aux points saillants ou à certaines extensions ou restrictions pouvant nécessiter une explication. On peut obtenir plus de renseignements de la Section de l'analyse et du développement, Division de l'industrie, Statistique Canada, Ottawa, Ontario, K1A 0T6.

Établissement. La plus petite unité d'exploitation, en général une usine ou une fabrique, en mesure de fournir certaines données sur ses entrées et sorties. Le nombre d'établissements pour 1975 a diminué à cause de l'exclusion des établissements qui ont été jugés de ne pas avoir d'employés. Les statistiques principales d'un établissement exerçant son activité dans plus d'une municipalité sont attribuées au prorata à des quasi-établissements. Ces derniers sont considérés comme des établissements dans les totalisations.

Période de déclaration. Toute année financière terminée au plus tôt le 1^{er} avril de l'année de référence ou avant le 31 mars de l'année suivante.

Coût des matières et fournitures. En général, il s'agit uniquement des produits utilisés et achetés au prix livré, les frais de transport et de manutention, les droits d'accise, etc., étant inclus. Comprend les transferts entre les unités d'une même société et les travaux exécutés par d'autres sous contrat. Au niveau de l'activité manufacturière, ce poste représente les produits achetés qui entrent dans la fabrication.

Coût du combustible et de l'électricité. Il s'agit uniquement du combustible et de l'électricité consommés et achetés au prix livré, les frais de transport et de manutention, les droits d'accise, etc., étant inclus. Les données relatives à l'activité non manufacturière figurent avec le secteur de la fabrication sauf lorsque l'unité auxiliaire utilise un questionnaire distinct de "siège social". Dans ce dernier cas, le combustible rapporté est compris dans l'item "Coût des matières..." sous la rubrique "Activité totale" seulement.

Valeur des livraisons de produits de propre fabrication. Valeur nette des ventes de produits fabriqués par l'établissement déclarant, ou pour son compte, à partir de matières lui appartenant, sans tenir compte des rabais, retours de marchandises, remises, taxes de ventes, taxes et droits d'accise, contenants restituables, frais de livraison payés à des transporteurs publics ou à forfait (mais non des frais de livraison de l'établissement même). Comprend les recettes au titre de réparations et de contrats, les transferts à d'autres unités déclarantes du même établissement, toutes les exportations, la valeur comptable des propres produits de l'établissement donnés en location la première fois. Les livraisons en consignation destinées à d'autres pays sont comprises, mais les livraisons en consignation au Canada figurent avec les stocks jusqu'à la vente.

Valeur ajoutée. Production nette, soit production brute moins consommation de produits achetés et travaux exécutés par d'autres sous contrat.

Valeur ajoutée, activité manufacturière: valeur des livraisons de produits de propre fabrication, plus variation nette des stocks de produits en cours et de produits finis, moins coût des matières et des fournitures utilisées, du combustible et de l'électricité.

Value added, total activity: consists of value added, manufacturing activity, and value added, non-manufacturing activity. The latter is calculated by subtracting relevant commodity inputs from non-manufacturing revenue or output; these commodity inputs are net of the change in inventories of goods purchased for resale. Non-manufacturing revenues include depreciable fixed assets produced by own work force for own use, revenue from product rentals, etc., but exclude non-operating revenue such as real property rentals, dividends or interest.

Employees, salaries and wages. Salaries and wages are shown before deductions for income tax and employee portion of employee benefits and include payments for regular work, overtime and paid leave as well as bonuses and commissions paid to regular employees. Production and related workers in manufacturing activity include those employees at the establishment engaged in processing, assembling, storing, inspecting, handling, packing, maintenance, repair, janitorial and watchmen services and working foremen. (Outside pieceworkers' remuneration is included in cost of materials.) Respondents are asked for average month-end employment.

Inventories. Book value of owned inventory held in Canada, including goods in transit and on consignment.

Small establishments. For establishments below size limits varied to assure adequate coverage of industry totals by large-establishment returns, a simplified "short form" questionnaire is used or, if applicable, a regular financial statement is accepted. This involves certain departures, beginning in 1970, from definitions used for large establishments. Number of employees is imputed from salaries and wages, with imputation also of male and female numbers and person-hours. All data are classified to manufacturing activity. Totals for size groups or geographical areas dominated by small establishments may have limited comparability with totals for previous years or other geographical areas. Similar procedures are applied where data for small establishments are obtained from administrative records of Revenue Canada.

Head offices, sales offices and ancillary units. Included in the individual industry of the company's largest activity. (The allocation of some such units to the major industry group level was discontinued with the 1970 data.)

Valeur ajoutée, activité totale: comprend la valeur ajoutée par l'activité manufacturière et la valeur ajoutée par l'activité non manufacturière. Cette dernière s'obtient en soustrayant les entrées de marchandises des recettes ou des sorties provenant de l'activité non manufacturière, après avoir soustrait de ces entrées la variation des stocks de produits achetés pour la revente. Les recettes provenant de l'activité non manufacturière comprennent les immobilisations amortissables produites par la main-d'œuvre de l'établissement pour son usage propre, les recettes de location de produits, etc., mais non les recettes hors exploitation, comme les loyers d'immeubles, les dividendes, les intérêts.

Salariés, traitements et salaires. Les traitements et les salaires sont pris en compte avant les retenues au titre de l'impôt sur le revenu et les cotisations aux fins des avantages sociaux versées par l'employé, et comprennent la rémunération des heures normales et supplémentaires et des congés payés, ainsi que les primes et commissions accordées aux salariés réguliers. Les travailleurs de la production et assimilés classés dans l'activité manufacturière comprennent les salariés de l'établissement affectés à la transformation, au montage, à l'entreposage, au contrôle, à la manutention, à l'emballage, à l'entretien et à la réparation, ainsi que les concierges, gardiens et contremâîtres de l'établissement. (La rémunération des ouvriers à la pièce de l'extérieur est comprise dans le coût des matières.) On demande aux enquêtés d'indiquer le nombre moyen de leurs salariés à la fin du mois.

Stocks. Valeur comptable des stocks détenus en toute propriété au Canada, y compris les marchandises en transit ou en consignment.

Petits établissements. Pour les établissements en deçà des limites de taille, modifiées afin de prendre en compte de façon aussi complète que possible des chiffres déclarés par les grands établissements, on utilise une "formule abrégée" ou, le cas échéant, un état financier ordinaire. On a dû pour cela s'écarter, à partir de 1970, des définitions utilisées pour les grands établissements. On impute le nombre de salariés à partir des traitements et des salaires, ainsi que le nombre d'hommes et de femmes et le nombre d'heures-personnes. Toutes les données sont classées à l'activité manufacturière. Les totaux des groupes de taille ou des régions géographiques où dominent les petits établissements peuvent ne présenter que peu de points de comparaison avec les chiffres des années précédentes ou ceux d'autres régions géographiques. Des procédures semblables sont employées lorsque les données pour les petits établissements sont obtenues des dossiers administratifs de Revenu Canada.

Sièges sociaux, bureaux de ventes et unités auxiliaires. Classés avec l'industrie qui représente l'activité principale de la société. (Le classement de certaines de ces unités au niveau des groupes a cessé à partir de 1970).
